Hello,

Firstly, I have to say THANK YOU. This Roulette Sniper is exactly something I was looking for a long time. I have already earned 1200 EURO from my starting point of 100 EURO. But I have some ideas for improvements that could be implemented in new version of the Roulette Sniper. There it goes:

- 1) There should be possibility to save settings of the Roulette Sniper. Because every time I quit the program I need to set it up again and thats really annoying.
- 2) There should be also possibility to reverse the "Roulette Board" picture, because there are also casinos, that has roulette board conversely placed that is shown the picture in Roulette Sniper.
- 3) I think this is the first system that actually works when it is set correctly, so keep the good work going on.

One again thank you,
Daniel.

Players may select the bet they wish to place or the system will automatically place the bet. Each system is able to determine the right number to bet on by utilizing an advanced algorithm that constantly generates and analyzes a sequence of random numbers and ranks them based on probability. A number is then chosen that represents the likelihood of the number to come up at any given time. This number is then applied to the player's stake and the software will automatically place the bet for optimal returns. Roulette Sniper is capable of monitoring and placing bets on an extensive range of roulette systems including European, American, and Italian, as well as splitting and doubling bets. Roulette Sniper has been in development for over three years and is the most advanced roulette number tracking software available. Software Features Roulette Sniper is a sophisticated roulette number tracking software system that analyses the outcome of various roulette systems, including the most popular systems of European, American, and Italian. All roulette systems are analysed at once, displaying the most profitable outcome, which may

be European, American, or Italian, depending on the system chosen. This feature is particularly useful for American Roulette players, as it allows players to track the best number to bet on in the outcome of an American Roulette table, particularly when the ball lands on zero or double zero. Roulette Sniper is capable of automatically placing bets on any system, splitting, doubling, and mutiplebetting. Advanced Algorithm Roulette Sniper is a multi-system, advanced roulette number tracking software that monitors the best time to place your bets on the roulette table, depending on the selected system, including the popular European, American, and Italian systems. Players may select the system they wish to bet on, or the system will automatically place the bet. Each system is able to determine the right number to bet on by utilizing an advanced algorithm that constantly generates and analyzes a sequence of random numbers and ranks them based on probability. A number is then chosen that represents the likelihood of the number to come up at any given time. This number is then applied to the player's stake and the software will automatically place the bet for optimal returns. In-Depth Data Analysis Roulette Sniper enables in-depth data analysis by allowing players to view detailed analysis and statistics, in addition to monitoring the results of any selected system. This includes the roulette table, system, and numbers monitored by the system. The user may also view detailed analysis of the monitored system 82157476af
